Deep Integration for a Seamless Experience

- Embed the learning experience
  Add Connect® assignments directly into your Blackboard Learn™ Course Workflow

- Eliminate the #1 source of student complaints
  Get started quickly and easily with single sign-on

- Automate grade synchronization
  Connect assignment grades are automatically recorded in the Blackboard Learn gradebook
Productivity. Efficiency. Simplicity.

Enjoy simplified access to the high quality, media-rich content and adaptive learning and assessment engines for faculty, students, and institutions.

Key Features

- **Single Sign-On**
  A single login and single environment provide access to McGraw-Hill course resources within Blackboard Learn.

- **Direct Assignment Links**
  Connect assignments appear as normal Blackboard Learn assignments would — in the assignment list, the calendar and the to-do list.

- **One Gradebook**
  All grades for McGraw-Hill Education assignments are recorded in the Blackboard Learn gradebook automatically.

Embedding the Learning Experience

This deep integration into a learning management system offers a more elegant experience for all course resources. It is more than just supporting single sign-on and grade-sync. It’s about embedding the learning experience within the LMS, allowing the student to continue studying without interrupting their flow.

Administrators and Designers

- **How Can I Get It?**
  McGraw-Hill Education’s deep integration with Blackboard Learn requires the installation of our app. Once that is complete, instructors can pair their courses and start utilizing the platform.

- **Support**
  McGraw-Hill Education provides first class support and training for administrators, faculty, and students, including Quick Start Guides and Admin Guides.

- **Easy-to-Use**
  Designers can easily create consistent, deep, and rich embedded experiences for instructors and students using engaging, media-rich, and high quality content.

Efficient Deployment

Connect spans all courses, and training for pairing and assignment deployment is a one-time event, whether you choose to deploy across a school, a department, or a specific course. Updating assignments and managing due dates requires no further mediation once pairing is complete, with changes cascading from Connect straight to Blackboard Learn — just like native assignments.
