The Future Ready Interactive Planning Dashboard is one component of Future Ready Schools, a bold effort focused on maximizing school districts’ digital learning opportunities to prepare students for success in college, a career, and citizenship. Nationwide, more than 1,950 school district superintendents have taken the Future Ready District Pledge—a promise to personalize learning for students through a systemic digital transformation. To help them fulfill that promise—and determine their readiness to do so—the Alliance for Excellent Education (the Alliance) has developed the Future Ready Interactive Planning Dashboard, a free online tool to help district leadership teams plan systemically to use technology effectively to engage students, empower teachers, and improve learning outcomes. Through the dashboard, district leaders assess their needs, identify gaps, obtain strategies, and plan and track their progress over time.

Implementing meaningful digital learning requires more than just purchasing devices for a school district. It requires thoughtful planning, preparation, and analysis of student outcomes, teacher development, culture, and leadership. That’s where the Future Ready Interactive Planning Dashboard can help. The dashboard takes school district leaders through each step of a systemic planning process to create a comprehensive approach and action plan for implementing digital learning before they purchase a single thing—ensuring a much better chance for successful implementation.

At the heart of the dashboard is the Future Ready Framework for digital learning planning that places student learning at the center, emphasizes empowered and innovative leadership, and focuses on seven key categories (called gears):

- curriculum, instruction, and assessment;
- professional learning;
- use of time;
- data and privacy;
- community partnerships;
- technology, networks, and hardware; and
- budget and resources.

Through the dashboard, district teams complete an in-depth self-assessment to determine their overall readiness to undergo a digital transformation, create a vision for student learning, and evaluate what aspects of the system they must address to make that vision a reality. After completing the self-assessment, each district team receives a personalized report that analyzes the district’s readiness in each of the seven gears, identifies gaps, and offers customized strategies and free resources developed by the Alliance and the more than forty Future Ready coalition partners, including the U.S. Department of Education.

Additionally, the dashboard offers highly detailed gear assessments as well as one designed to analyze a district’s overall leadership. District teams can use the gear-specific assessments to explore each of the gears further, focusing on additional strategies and resources to close their district-specific gaps. These gear assessments also allow district leaders to monitor the progress of their implementation plans.

Once district teams assess their readiness for digital learning, the dashboard template guides teams to identify gaps, select strategies, set goals, and build action plans to achieve them. Upon completion, each team will have a fully customized plan for implementing digital learning to personalize instruction in its school district. Furthermore, the dashboard saves all of the team’s analysis and planning in a secure password-protected format, so district leaders can revisit the dashboard at any time to review their readiness reports and action plans, update their goals, identify new strategies and resources, and retake the assessments to monitor the progress of their implementation plans. Individual team data remains confidential and the Alliance will not share, market, or sell any district-identifiable data without written consent from the district team. For more information, see the dashboard’s privacy policy.

The Future Ready Interactive Planning Dashboard is made possible through the generous support of AT&T and McGraw-Hill Education.

Read what other district leaders are saying about the Future Ready planning process:

“[The] #FutureReady dashboard is [a] game-changer for district planning to bring technology integration to scale.”
— Charles Sampson, superintendent, Freehold Regional High School District, NJ

“Thanks to #futureready, educators across the country are able to collaborate and access evaluative tools to plan and ensure the connectivity of students across the nation. I am honored to stand with superintendents across Georgia and our country in this effort. Digital learning and the accessibility of digital tools is not optional, and it is not cutting edge—it is simply a crucial platform to ensure students receive the highest quality of education.”
— Dr. Philip D. Lanoue, superintendent, Clarke County School District, GA, 2015 AASA Superintendent of the Year

“As the entire nation moves into and through the digital conversion, districts like ours will benefit from the support network that includes experts from the U.S. Department of Education, as well as the local state departments of education. I am delighted with the amount of planning that [is] occurring to assist districts in providing access to devices and the web to enhance instruction. Providing conditions in which students can thrive and gain experience helps create college- and career-ready young people.”
— Michael D. McIntosh, superintendent, Redmond School District, OR
